Overview

The Master in Interior Design is meant for individuals interested in understanding contemporary interior design, taking into account several subjects like art, history of design, colorimetry, materials management, financial planning and smart strategies in a multidisciplinary perspective. In particular, the Master program provides professionals with the competence, responsibility, sensitivity to changeable modern needs and capability to control the entire planning process. Strategic planning and management skills together with the experimentation of creative and unconventional forms and solutions give the students the right instruments to balance the interplay between desire, images and essential practical needs.

Learning Objectives

The Master in Interior Design responds to the modern necessity of experiencing and living aesthetically pleasing and significant objects and places, capable of transmitting emotion and increasing the well-being of living spaces.

In particular, the Master aims at training professionals capable of inserting themselves with competence and responsibility in the job market, sensitive to changing modern demands and able to control the entire design process. The Master's examines all main aspects of design, both theoretical and above all applicative: all elements of design and creation will be discussed in depth.

Outcomes and Professional Profile

The Master program is structured to train professionals to meet the needs of internationally renowned interior designers, through an innovative approach combining theoretical knowledge with practical experiences. Virtual laboratories, case studies, lectures and testimonies given by experts in the field ensure a highly practical and operational approach which emphasizes the Italian creativity and management system which made the fashion sector an excellence in the world. The knowledge and skills acquired during the Master program enable students to work in the furnishings and decorations industry, in different retail outlets or in professional offices specialized in the sector. The interior designer works in close contact with architectural firms. He/she is competent in different sectors: interior design of houses, offices, set design, hotels, conference centers and luxury stores, Centres and luxury stores.

Final Thesis

The final thesis of the Master's program, intended to assess the technical, scientific and professional preparation and competences of the student, requires the completion, discussion and presentation of a written project work during the dissertation.
